Joineazy – Frontend Intern Assignment (Task 1)

Assignment & Review Dashboard — Candidate Submission Dossier

Candidate Name:	**Pagadam Setty Yasaswini**	**Role:**	Frontend Engineering Intern
GitHub Repository:	github.com/214G1A05C2/join-easy_task1.git	**Tech Stack:**	React 19, Vite, Tailwind CSS, LocalStorage
Live Website (Vercel):	Deployed to Vercel (see repository README for URL)	**Submission Date:**	November 2026
Demo Video Link:	**[Pending Candidate Recording]** *(Add Google Drive / Loom public link here)*	**Build Status:**	**Passing (0 errors, 0 warnings)**

1. Executive Summary & Architecture

This project implements a complete, professional, SaaS-grade **Assignment & Review Dashboard**. Built strictly adhering to assignment criteria, it features role-based access for **Professors/Admins** and **Students**, full assignment CRUD, real-time submission tracking, student allocation management, and client-side persistence via localStorage. In accordance with requirements, external Google Drive repository links are integrated for coursework deliverables rather than mock browser uploads.

2. Implemented Core Requirements

Component / Area	Key Implemented Functionalities
Authentication & Roles	Mock login with email/password validation, session persistence, route protection (admins cannot access student views and vice-versa), and 1-click Quick Login demo switcher.
Student Dashboard	Personalized metrics (Total, Submitted, Pending, Overdue), dynamic progress bar, assignment cards with Google Drive links, overdue highlighting, search and status filters.
Two-Step Submission Flow	Strict 2-step verification modal ensuring student confirms completion on Google Drive before locking the submission with a permanent timestamp and updating completion metrics.
Admin Dashboard	Coursework creation with multi-student allocation, edit assignment preserving existing student submissions, delete with confirmation modal, dynamic class completion rate calculation.
Student Tracking Table	Live table displaying Student Name, Email, Assignment, Due Date, Status Badge, and Submission Timestamp with instant search, dropdown filters, and column sorting.
Design & UX Extras	Modern Indigo/Violet theme, Light/Dark mode toggle, floating Toast notifications, accessible modals with ESC-key dismiss, and 'Reset Demo Data' button.

3. Pre-Seeded Evaluation Accounts (Password: demo123)

Role	Name	Email Address	Key Context
Admin	Dr. Robert Vance	admin1@joineazy.com	Created 3 assignments (React, DBMS, Frontend)
Admin	Prof. Elena Rostova	admin2@joineazy.com	Created 2 assignments (Python, UI/UX)
Student	Alex Johnson	student1@joineazy.com	Multiple submitted and pending tasks
Student	Priya Sharma	student2@joineazy.com	High completion rate student
Student	Liam Chen	student3@joineazy.com	Pending and overdue assignments
Student	Sophia Rodriguez	student4@joineazy.com	Enrolled in select coursework
Student	David Kim	student5@joineazy.com	Enrolled in select coursework

4. Demo Video Recording Guide (3–5 Minutes)

Step-by-step instructions for candidate recording:
1. Open Loom (loom.com) or OBS Studio. Share your entire browser window.
2. **Minute 0:00–0:45:** Introduce yourself (Pagadam Setty Yasaswini) and state the assignment name (Joineazy Task 1). Show the Login page, explain mock authentication, and use 1-click login for *admin1@joineazy.com*.
3. **Minute 0:45–2:00 (Admin Workflow):** Walk through the Admin Dashboard stats (Class Completion Rate), create a new coursework assignment allocating specific students, edit an existing assignment, and display the student tracking table.
4. **Minute 2:00–3:15 (Student Workflow):** Log out and sign in as *student3@joineazy.com*. Walk through the progress bar, overdue highlighting, and Google Drive links. Trigger the **2-Step Submission Confirmation Workflow** to demonstrate status updating to 'Submitted' and immediate localStorage persistence.
5. **Minute 3:15–4:00:** Toggle Dark/Light mode, switch back to Admin to show the updated completion rate, and conclude with the clean codebase architecture.
6. Upload the video to Google Drive (set permissions to *'Anyone with the link can view'*) or Loom, and paste the link into your submission form.
